The Month’s Top New Releases

Every month is an exciting opportunity to discover new releases and play your next favorite game. This February is no exception. From remastered collections of older classics to eagerly anticipated unveilings of AAA mainstays, this month has a full slate of launches and releases.

- Dyna Bomb – February 1st

While technically released on the 31st of January, Dyna Bomb makes our list of one of February’s top new games. An interactive arcade style action game, Dyna Bomb features intuitive and addicting gameplay to go along with features such as a wheel of fortune, different character designs and a retro visual design.

- Life is Strange: Remastered Collection – February 1st

This month’s remastered collection of Life is Strange brings you back to Arcadia Bay to relive Deck Nine Games’ two award-winning games Life is Strange and Life is Strange: Before the Storm. Along with remastered visuals, updated puzzles and engine and lighting upgrades, the remastered collection will also feature improved character animations based off a full facial mocap performance.

- The Dead Tree of Ranchiuna – February 1st

An immersive story-based gaming experience that explores the harsh reality of life, The Dead Tree of Ranchiuna is a great choice for any gamer interested in complex puzzles, highly detailed open world environments, and a storyline that focuses in on the injustice and unfairness of society and life.

- Dreamscaper – February 2nd

Each of us live lives separated by the dichotomy of our waking and sleeping hours. Dreamscape builds on that separation with a game that uses our waking and dreaming cycles to create a unique gameplay cycle. By day, you'll explore cities and build relationships, while at night you'll fight nightmares and challenge your inner subconscious in an ever-shifting nocturnal world.

- Dying Light 2 Stay Human – February 4th

Taking place in a post-apocalyptic world that’s been thrust back into the dark ages after a virulent global pandemic, Dying Light 2 Stay Human takes you into a world where you’ll need both brains and brawn to survive. With an expansive open world environment, you’ll have to navigate a collapsing apocalyptic civilization while doing your best to maintain your own humanity.

- Edge of Eternity – February 10th

Originally released for Windows PC in June 2021, Edge of Eternity has already won the hearts of gamers with its classic JRPG styled gameplay and tactical strategy. The new RPG is finally coming to consoles like Xbox in February and is sure to thrill with its incredible world that blends fantasy and sci-fi, robots and magic.

- Elden Ring – February 25th

The long-awaited arrival of a joint project developed by Hidetaka Miyazaki, director of critically acclaimed games such as Armored Core and Dark Souls, and George R.R Martin, author of the Game of Thrones series, is finally coming on February 25th. While developed by Miyazaki, Martin was given full creative freedom to write the overarching backstory of the game, as well as the foundation of the main narrative.

Players will be given the opportunity to customize their characters with a wide degree of creative latitude in addition to the usual skill specialization and job and character classes. Skills will also be obtained through exploration and task completion, rather than the traditional tech trees in most RPG’s. Elden Ring will also have features lacking in previous Miyazaki iterations such as horseback riding, and the summoning of companions for online play.

When it comes to new games and releases, this month is shaping up to be one of the year’s best. What games are you most excited to play this month? Let us know in the comments below!
